Score overview

Category	Score	Rating	After Europass CV
ATS (Applicant Tracking System)	78/100	Strong	95/100
Tone & Style	75/100	Strong	92/100
Content	65/100	Good start	82/100
Structure	80/100	Strong	97/100
Skills	70/100	Good start	90/100
Overall	**72/100**	**Strong**	**89/100**

ATS — 78/100

✓ **Strength: Clear section headings that ATS can parse**

✓ **Strength: Includes React and TypeScript keywords**

! Improve: Add 'REST API' and 'Jest' keywords from the job description

Tone & Style — 75/100

✓ **Strength: Professional, concise language** — Bullet points are short and start with action verbs such as 'Built' and 'Designed'.

! Improve: Avoid first-person pronouns — The summary uses 'I am'. Resumes read better in implied first person, e.g. 'Frontend developer with...'.

! Improve: Keep tense consistent — Past roles mix present and past tense. Use past tense for finished work.

Content — 65/100

✓ **Strength: Relevant university projects** — The AI Resume Analyzer project directly shows React and API experience.

! Improve: Quantify your achievements — Add numbers, e.g. 'reduced page load time by 30%' or 'used by 200 students'.

! Improve: Mention testing experience — The job lists Jest as a plus; add any unit tests you have written.

Structure — 80/100

✓ **Strength: Single-page layout** — One page is ideal for a junior candidate.

✓ **Strength: Logical section order** — Education, Skills, Projects, Experience is a good order for a student.

! Improve: Avoid tables for skills — Some ATS cannot read tables. Use a simple comma-separated list.

Skills — 70/100

✓ **Strength: Strong core frontend stack** — React, TypeScript, Tailwind CSS and Git match the job requirements.

! Improve: Add accessibility (a11y) — The job mentions accessibility; list any ARIA or WCAG experience.

! Improve: Group skills by category — Split into Languages, Frameworks and Tools so recruiters scan faster.
